# Outline

*Aviation Weather Information*

- **Background**
- **Research Areas**
- **Progress since last year**

# Background

*Aviation Weather Information*

- **Weather is a major contributing factor in accidents:**
  - **33% Commercial carrier**
  - **27% General aviation**
- **Many accidents are due to lack of weather situation awareness and poor decisions.**
- **Provision of strategic weather information during the en route phase enables avoidance of adverse conditions.**

# Plan

## *Aviation Weather Information*

### Goal

**Develop technologies and methods for providing pilots with sufficiently accurate, timely and intuitive information during the en route phases of flight which, if implemented, will enable a 25 to 50% reduction in aircraft accidents attributable to lack of weather situation awareness**

### Objectives

**Develop Needed  
Weather Products and  
Sensing Capabilities**

**Develop Enhanced  
Weather Presentations  
and Decision Aids**

### Challenges

**Improved Forecasts  
Need Better  
Input Data**

**Existing Aircraft  
Need Retrofit  
Capability**

**Pilot Workload  
Should Not Be  
Increased**

**Diverse Aviation User Groups**

### Approach

**Use Aircraft and  
Satellites as Wx  
Data Collectors**

**Develop Technologies  
for Installed and  
Portable Systems**

**Provide  
Decision Aids and  
Operational Guidelines**

# Aviation Segments

*Aviation Weather Information*

**2 Pilots**  
**Above the weather**

**1 Pilot**  
**In the weather**

# Product Development Breakdown

## *Aviation Weather Information*

### Aviation Weather Information

#### Cockpit Weather Information System Technologies

##### Information Acquisition & Conditioning Technologies

Information Fusion

Enhanced Onboard Radar Capabilities

Aviation Applications of Advanced Satellite Sensing

##### User Interface Technologies

Display and Aiding Guidelines

Strategic Flight Planning Tools

Prototype Systems

##### Weather Information Systems Architecture

System Concepts and Requirements

Technology Assessments and Trade Studies

#### Airborne Weather Reporting Sensor Technologies

##### TAMDAR

NASA, FAA & NOAA Coordinating Team

Requirements and Operational Concept

Prototype Sensor Suite

# Partnerships

*Aviation Weather Information*

**Flight Standards  
Certification  
Weather Policy  
Weather Products  
Flight Information Services**

**Aviation Weather Center  
Forecast Systems Lab**

**Honeywell**

**Rockwell  
Collins**

**NCAR** National Center for  
Atmospheric Research  
University Corporation for Atmospheric Research

**Research Triangle Institute** 

 **VirginiaTech**  
VIRGINIA POLYTECHNIC INSTITUTE AND STATE UNIVERSITY

# Cooperative Research

*Aviation Weather Information*

# Development of AWIN Capability

Aviation Weather Information

December 2000 - NASA Evaluation of AWIN System on NASA B-757

Winter 2001 - In-Service Evaluation by United Airlines on Airbus

Summer 2002 - WINN selected for Honeywell Epic Avionics

Summer 2000 - NASA AWIN General Aviation System Research on NASA B-200 King Air

Summer 2000 - ARNAV General Aviation Data Link Weather Information System

December 2001 - Bendix/King General Aviation Data Link Weather Information System

# Cockpit Weather Information Systems

*Aviation Weather Information*

**ARNAV**

**Honeywell**

**WSI**

**ARINC**

**EchoFlight**

**FlyTimer**

**Jeppesen**

**Baron**

**AirCell**

**Avidyne**

**Garmin**

**UPSAT**

**SATELLINK**

**ControlVision**

**Universal**

# Technology Development

*Aviation Weather Information*

**Weather Channel in the Cockpit**

**Implementation Catalyst**

**Develop viable 1st generation systems**

**Stimulate implementation**

**Information; Not Data**

**Next generation technologies**

**Data fusion**

**Alerting and decision aiding**

# Accomplishments

*Aviation Weather Information*

- **Flight**

- **TAMDAR Sensor Suite**
- **Airborne Hazard Awareness System (AHAS)**
- **Workload and Relative Position (WARP)**
- **Convective Weather Sources (CoWS)**
- **Correlation of Radar Reflectivity and Lightning (CoRRaL)**

- **Simulation**

- **Ownship Information and NEXRAD Resolution**
- **NEXRAD Looping and NCWF**

# Accomplishments

*Aviation Weather Information*

- **Advanced Satellite Aviation-weather Products (ASAP)**
- **Means to Improve PIREPS (I-PWR-UP)**
- **Part 135 Weather Safety Standards**
- **Needs of Special Populations**
- **Technology Assessments**
  - TAMDAR
  - ASAP
  - Automotive/Trucking Technologies

# Summary

*Aviation Weather Information*

- **NASA is partnered with the FAA, NOAA, industry and academia**
  - to develop affordable and effective technologies for datalink cockpit weather information systems
  - to realize the goal of reducing weather-related accidents
- **The first generation systems are being fielded**
- **The team is continuing to develop enhancements, operational guidelines and technologies for the next generation of these systems**
